What sets both you and the Audi Q5 apart: individuality.

The real strength of the Audi Q5 lies in its flexibility. The vehicle adapts to your every need. However, because we cannot tell exactly what you have in mind, we provide you with Audi Genuine Accessories so that you can customize your Audi Q5 to meet your own expectations.
We may not have reinvented the wheel, although given the numerous tests you might almost believe that we have.

This day-by-day use of Audi aluminium wheels subjects them to constant pressure. Extensive tests ensure that the wheels nevertheless fulfil the stringent quality requirements. The time-consuming production process also ensures high component strength, and the sophisticated multi-layer paintwork not only gives the vehicle its brilliant look but also provides effective protection against scratches.

Discover what other Audi Genuine extras are to special. You can also view our accessories. General terms and conditions apply on our mobile website.

Sport and design

Comfort and protection

Who says that shoes only play a role in the world of fashion? Our testers will pay attention to the different demands for quality of Audi Genuine Accessories – and, of course, your own.

Made-to-measure vehicle cover for outdoor use. Made from impregnated, two-layer, weatherproof polyester with Mosquito net. Provide protection against environmentally hostile influences such as scratches, dirt, dust, sunlight and rain. Incl. transport bag for easy storage. Washable.

Continuous stress testing procedure. The continuous stress testing procedure is necessary even for perfectly selected materials. Thanks to a testing process comprising approx. 50 testing procedures, the standards applied during testing are considerably more stringent than the statutory requirements. In addition, when purchasing summer tyres or when fitting winter tyres, Audi Genuine extras are able to ensure the usual Audi quality.

Audi Genuine extras

Speciality developed and adapted for each Audi model. This is why they are superior quality. For each Audi model, the necessary components are subject to continuous stress testing. Thanks to a testing process comprising approx. 50 testing procedures, the standards applied during testing are considerably more stringent than the statutory requirements. In addition, when purchasing summer tyres or when fitting winter tyres, Audi Genuine extras are able to ensure the usual Audi quality.

Accessories – and, of course, your own.
Sport and design

The stable system enables it easy to carry the bag outside like a vehicle.

Whether it’s the Kalahari, the Arctic or Florida – our roof rack modules are suited to the climate.

Weather tests simulate the different climate zones to which Audi Q5 owners may travel, including desert-like conditions in South Africa and by red sandstone rock and round. Various road surfaces and weather conditions present large challenges for developers. Whether it is rainy, stormy or blazing humid. Audi uses special weather testing to load and adjust the luggage boxes. In addition to the standard roof rack module, the Audi Q5 can be fitted with a roof rack module that can be used in conjunction with the roof rack provided as standard for the Audi Q5.

Diverse global weather conditions are simulated as part of Audi’s testing process. The weather testing is also the basis for Audi’s testing of the roof rack module, which simulates extreme driving conditions and helps to provide stability and driving comfort. The module has been tested extensively in a wind tunnel, ensuring an optimised profile of aerodynamic drag to reduce wind noise. The Q5 is also equipped with integrated rollouts and fastening rings in the luggage compartment via the roof rack module. The desired shape and size of the luggage boxes.

The Audi Q5 returns are optimised for the Audi Q5 roof rack modules. The desired shape and size of the luggage boxes.

Moisture. Available for rubber, metal and aluminium valves.

9. Air valve caps

The four metal valve caps with embossed Audi logo provide better protection for aluminium wheels.
Comfort and protection

Who says that shoes only play a role in the world of fashion?

Our testers will pay attention to those during a special shoes test. And once tested, they will
not go back to being just a pair of shoes. This is because such experiences are not just for the
footwear itself to be the main focus, but rather on the comfort and protection that the
shoe provides. These are the basic considerations that the shoes need to perform along
with the ability to be constantly changed. This is because even what is considered as
merely shoes, they must also be able to provide comfort and protection for the
wearer.

3. Tailored textile floor mats
Taraled to the size of the floor in the Audi Q5. Made from breathable and waterproof material, bearing the Audi signals. To prevent martens from making themselves comfortable on the floor, the points provided for this purpose on the floor of the vehicle. Washable.
