Level up

Audi connect plug and play

A smart connection

Discover the Audi connect plug and play app.

The Audi connect plug and play app (iOS/Android) is available for Audi owners in New Zealand.

Access more information than ever at your fingertips. The Audi plug and play app connects what is most important to you by sharing up-to-date vehicle information whenever you need it.

Turn your Audi into a connected car; explore vehicle data in real-time, maximise your efficiency per trip, request service appointments, optimise your driving style, and have total peace of mind with constant connection to Audi's roadside assistance.

You can download
the Audi connect
plug and play
app here.

A better overview in no time

With the latest
vehicle information
about your Audi

My Audi. Welcome. With the Audi connect plug and play app, you can access the latest information about your vehicle at any time.

In the “My Audi” section, you can view information such as mileage, chassis number and fuel level. You can even check how many kilometres and days are left until your next service appointment. This way, your next service is always at your fingertips.

A man with a beard, wearing a dark beanie and a dark, hooded jacket, stands with his arms crossed next to a silver car. He is looking out towards a large, rugged mountain range under a cloudy sky. The scene is set outdoors, likely in a mountainous or alpine region.

More time for what's important

With the digital
logbook for your
business and
private trips

Trips. The digital logbook gives you the means to bring transparency to how you document and categorise your business and private trips. The automatic log function makes it easy to record details such as starting point and destination, date and time of day, journey time and route, and export them via the app as required.

More control over your costs

The refuelling
and charging
monitor on your
smartphone gives
you a complete
overview

Fuel monitor. The fuel monitor gives you an overview of your refuelling processes and monthly fuel expenses. Whenever the Audi DataPlug registers a refuelling process, you receive an app notification that the fuel costs have been logged. The service* automatically records when, where and how much you refuel.

*minimum refuelling level of 10 l

Charging monitor. The charging monitor provides an overview of your charging expenses, how many kilometres you've driven and the charging status of your Audi. The app automatically registers when you charge your vehicle and stores the address of the charging station. You are then asked to enter your expenses. Useful feature: When the charge level is getting low, you will receive a reminder to recharge in good time.

*only available for the Audi e-tron

Greater efficiency on daily routes

With custom driving
style analysis
for your statistics

Statistics. Audi connect plug and play helps you optimise your driving style.

Personal driving data, such as acceleration, vehicle speed, engine speed and braking behaviour, is measured and displayed in a detailed statistical breakdown. This lets you learn from your own driving style and reach your destinations more efficiently.

**More space
for tailored
service**

With direct requests
for your inspection
appointments

Service appointments. With the Audi connect plug and play app, you can request an appointment at your Audi Dealer at any time. Including placing a direct call and with navigation assistance.

If your vehicle needs an inspection or an oil service, you have the option of automatically requesting a service appointment at your preferred Audi Dealer. Your Audi Dealer will then contact you as soon as possible and you can opt to provide them with relevant vehicle information.

More fun on the move

Always with new challenges on a journey of discovery

My challenges. Take fun at the wheel to the next level and discover selected nearby attractions. By adopting an efficient driving style, taking local discovery tours, visiting your Audi Dealer or regularly using the app, you can collect points and trophies. It's a great way to challenge your driving performance again and again in different categories. Level after level after level.

**More safety
on every trip**
With reliable roadside
assistance for your journey

Breakdown and assistance.

Fast assistance wherever you are should you have a breakdown or accident. Because the app's "Breakdown and assistance" function connects you with national 24-hour roadside assistance or with the Audi service hotline*. You have the option of transmitting your location and vehicle information as well as calling up important tips for what to do in an emergency.

In addition, the app displays a selection of your vehicle's warning and control lights. Supplementary explanations help you identify these correctly and respond appropriately should a control light be activated. This is what safety feels like.

*Costs are calculated according to the relevant tariff from your provider. Roadside assistance available within New Zealand only.

More connected to your car

With navigation to
your parking location

Parking space. With Audi connect plug and play, you always know precisely where you last parked your vehicle. Allow the app to conveniently guide you to your car – or share the GPS coordinates, for example with your friends. You can even keep an eye on how long you've been parked.

Connecting what's important to you

The Audi DataPlug
in conjunction with
the Audi connect
plug and play app

Thanks to Audi connect plug and play, many Audi models released in or after 2008 can become connected cars, capable of sending information to your smartphone via Bluetooth. No complicated installation necessary. The required Audi DataPlug can be obtained from your Audi Dealer and is then connected to your vehicle's diagnostics interface. A minor procedure for a major plus in mobility and safety.

Your benefits:

- > free app with simple and intuitive operation
- > connected on the move with key vehicle information
- > increased safety in an emergency with reliable roadside assistance*
- > complete control thanks to smart tools and a digital logbook
- > direct contact with your Audi Dealer to request an appointment

*Costs are calculated according to the relevant tariff from your provider.
